

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1.     **(Currently Amended)** A method comprising:  
          using of a cellulosic fibre of the Lyocell type produced using a dry-wet spinning process, in carpets, textile flooring materials, wall linings and/or decoration materials, wherein:  
          a ratio V of the strength of the fibre in the conditioned state (cN/tex) to the fibre elongation in a conditioned state (%) amounts to 2.2 or less and the titre of the fibre amounts to 6 to 25 dtex.
2.     (Previously Presented) A method of use according to claim 1, wherein the ratio V amounts to 2.0 or less.
3.     (Previously Presented) A method of use according to claim 1, wherein the ratio V amounts to 1.8 or less.
4.     (Previously Presented) A method of use according to claim 1, wherein the ratio V amounts to at least 1.
5.     (Canceled)
6.     (Previously Presented) A method of use according to claim 1, wherein the titre of the fibre amounts to 6.5 dtex to 25 dtex.

7. (Previously Presented) A method of use according to claim 1, wherein the titre of the fibre amounts to 12 dtex to 25 dtex.
8. (Previously Presented) A method of use according to claim 1 in the form of a staple fibre.
9. (Canceled)
10. (Previously presented) A method of use according to claim 6, wherein the titre of the fibre amounts to 15 dtex to 25 dtex.
11. (Cancelled)
12. **(Withdrawn - Currently Amended)** A carpet, textile flooring material, wall lining and/or decoration material compiled by a process comprising the steps of:  
providing a cellulosic fibre of the Lyocell type produced using a dry-wet spinning process, wherein a ratio V of the strength of the fibre in the conditioned state (cN/tex) to the fibre elongation in a conditioned state (%) amounts to 2.2 or less and the titre of the fibre amounts to 6 to 25 dtex; and  
producing the carpet, textile flooring material, wall lining and/or decoration material from at least the cellulostic fibre.
